

# 900-0211UK-C

- ✔ Plug-in Carbon Monoxide Alarm with Digital Display
- ✔ Digital display continuously shows danger levels detected
- ✔ Peak level display recalls highest danger levels recorded.
- ✔ Battery back-up - works even during a power-cut
- ✔ Continuously monitors CO levels
- ✔ End of life warning signal alerts you when alarm needs replacing after 7 years

## Product Description

The Kidde 900-0211UK plug-in carbon monoxide alarm is easy to set-up and use. It provides reliable protection against the dangers of carbon monoxide. Detailed user documentation ensures that the unit's operation is easy to understand.

These alarms plug directly into the 3-pin wall socket and have a back-up battery for continual protection in the event of a power-cut.

The digital LCD display shows CO levels detected at all times, giving increased analysis in the event of an emergency.

All Kidde carbon monoxide alarm have a 7-year sensor life.

Carbon monoxide is a colourless, tasteless and odourless gas that is produced when fossil fuels such as coal, oil, natural gas, LPG, charcoal and wood are not burned efficiently. It can be produced from poorly maintained or badly fitted domestic heating appliances such as boilers, wall heaters, wood burners, blocked flues or exhaust vents.

The symptoms of CO poisoning include headaches, sickness, tiredness and muscle pain - all of which can easily be misdiagnosed as flu. It is therefore important to protect your family and home with a carbon monoxide alarm.

Order Code	900-0211
Power Supply	230V Mains-powered (plug-in) with 9V back-up battery (supplied as standard)
